

WinSPC Software Training

Instructor-led training courses are held at the DataNet headquarters, onsite at your facility, or via the web. For detailed course descriptions, schedules and online registration visit www.winspc.com.

2021 PRICING

Virtual & Classroom WinSPC Training

WinSPC Administrator Training (4 day) \$1,500

In-depth, hands-on instruction designed to educate new users on how to successfully deploy and maintain WinSPC. Students learn to: set up parts, variables, attributes and tags; configure collection plans; connect devices; layout the operator interface; perform analysis and queries; generate reports; setup alarms and triggers; build equations; administer user permissions; and perform system maintenance.

SPC Fundamentals Training (1 day) \$750

Learn the SPC basics of developing and interpreting control charts, histograms, capability indices (Cp, Cpk, Pp, Ppk), pareto charts, cause and effect diagrams, and more. This class is intended for SPC beginners or anyone who needs a refresher course on SPC tools.

Instructor-led training is available in person or virtually. See website for current availability.

Instructor-led classroom training is conducted at the DataNet headquarters in Southfield, MI. Students receive all training materials and have access to a personal desktop computer while participating in a classroom with up to 15 peers.

Instructor-led virtual training is conducted with the goal of remotely replicating classroom training. Students have access to a remote desktop computer session while also watching the remote instructor and participating with other students. The coursework and experience is essentially the same, except that travel/presence is not necessary.

Onsite Instructor Training

Training at Your Facility \$2,000/day

All training classes are available as an onsite service. The customer is responsible for providing the training facilities, including an overhead projector for the instructor and a computer workstation for each student. The daily price includes up to 10 students and training materials. Transportation, lodging and per diem costs are billed separately.

Personalized Online Training

Interactive Training (6-hour blocks) \$1,200/per block

DataNet hosts online training sessions tailored to your needs. The live, interactive training is customized to cover only the topics you select and is personalized to your specific manufacturing environment.

The Internet training sessions are scheduled at your convenience and you can include as many online participants as desired. It's an economical way to get everyone on your team up to speed using WinSPC in your manufacturing environment, or to refresh the team on SPC fundamentals.

Recorded Training

WinSPC Basics Recorded Training \$500

This instructor-led training is delivered by DataNet's senior WinSPC trainer and covers 17 topic areas of WinSPC functionality. The recorded training, together with the accompanying training manual, is both a cost-effective refresher for administrators who have attended the WinSPC Administrator Training course and an efficient way for occasional users to begin learning specialized features.

The recording and training manual are available digitally. Price includes unlimited use throughout the purchasing facility.
